

Electronic Prescription of Controlled Substances (ePCS) Provider Steps

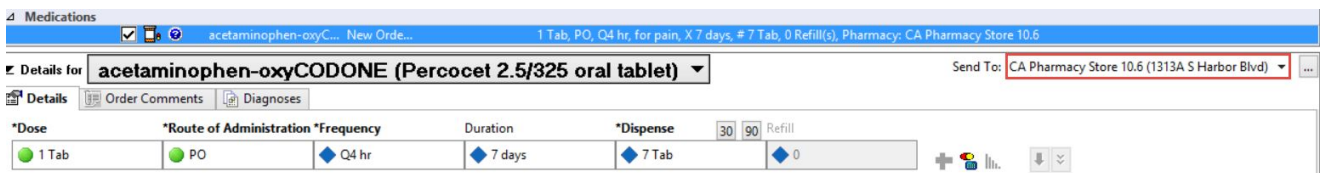

Ascension

Because of upcoming changes to Kansas State Law in July 2021, the workflow will change from printing out these prescriptions to an electronic routing to the patient's pharmacy.

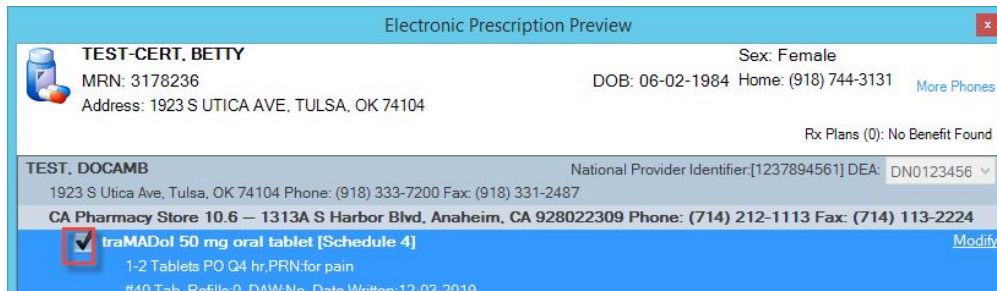

To enroll for ePCS, you may leave contact information at 316.261.8460 or email onechartapp@viachristi.org . You will be contacted to meet during business hours.

Workflow for Providers:

1. Enter prescription for controlled substance and complete the **Order Details**.
2. Confirm **Preferred Pharmacy** with patient and select from the **Send To** dropdown.
3. **Sign**

4. The **Electronic Prescription Preview** window will display. Place a checkmark in the box next to each medication and **Sign**.

5. Enter **Network password** in the **Confirm your identity** window.

6. Approve the push notification sent to your device. If the push notification has expired on your device you will get the **Confirm your identity** window, asking for an **Imprivata Token Code**.
