Windows 7 and Windows 8 install instructions

On the Via Christi VPN web page, click on the link “Click here to install the latest AnyConnect VPN client”

You may receive the following two prompts during the install; click Run on both messages.

Click Yes, on the message “Do you want to allow the following program to install software on this computer?”.

Click OK to disconnect your current VPN session. After the upgrade is completed, you will have to restart your VPN session.
You may receive the following message, click OK.

![Cisco AnyConnect VPN Client window](image1)

The VPN client service has been stopped. The VPN connection has been disconnected. Close all sensitive networked applications.

You may receive the indicator bar message like the one below, it will disappear automatically; the install is finished. Close your Windows browser.

![Cisco AnyConnect Secure Mobility Client window](image2)

On your desktop, click ![Cisco AnyConnect icon](image3) icon to launch the VPN connection.

**Removing the old Cisco icon from your desktop**

Your old Cisco AnyConnect icon will no longer work. It looks like this:

![Old Cisco AnyConnect icon](image4)
To remove this icon, use your mouse to right-click on the icon and select Delete. Click Yes or Confirm Delete on the next prompt to confirm your deletion:
